Please add the following new claims:

--53. A method for ameliorating LHRH analogue-induced reduction in bone density in a patient comprising administering to said patient one or more LHRH analogues and a 6-hydroxy-2-(4-hydroxyphenyl)-3-[4-(2-piperidinoethoxy)benzoyl]benzo[b]thiophene wherein said one or more LHRH analogues and said 6-hydroxy-2-(4-hydroxyphenyl)-3-[4-(2-piperidinoethoxy)benzoyl]benzo[b]thiophene, or the hydrochloride salt, are administered sequentially or simultaneously.

54. A method of inhibiting LHRH analog-induced detrimental side effects due to the administration of an LHRH analog to a patient, wherein said detrimental side effect is reduction in bone density, comprising administering to a patient in need thereof an effective amount of 6-hydroxy-2-(4-hydroxyphenyl)-3-[4-(2-piperidinoethoxy)benzoyl]benzo[b]-thiophene.--
